

## History of Italy

There are non - European immigrant councillors,

They support the town council and the districts.

They don't have the power of vote but of word.

They have the right to a reimbursement, there are the elections.

But the season of freedom is far from coming:

Also we made the so - called patchwork

(left - overs from balls of wool...), every woman

Made a square, it measured twenty by twenty,

That was Harlequin's suit, that is the History of Italy.

It never rains in this city on the plain

(I have an excellent friend, I can trust her with my eyes closed)

When then will I really love? Higher higher -

This North wind carries away trees and blinds

Rolling rubbish bins along the roads, the traffic lights bend -

It chases away jealousy and bad thoughts, even nostalgia
